Tool Website Keyword Analysis

Aapke 9 SEMrush screenshots ka analysis (8 Nov 2026, US database, Desktop). Keywords: mp3 to midi, yaml to json, stl to gcode, psd to png, etsy fee calculator.

Seedha verdict

- **KD 10 se neeche koi nahi mila.** Paanchon keywords ka KD Semrush par 22–31 hai (23% aur 27% ko Semrush "Easy" bolta hai, 31% ko "Possible"). Semrush ka KD Ahrefs se alag scale par chalta hai, isliye Semrush me KD <10 ka filter bahut strict hai. Realistic target: **KD ≤ 30** + SERP check.
- **Sabse kamzor SERP: stl to gcode.** Visible 8 results me forums, GitHub aur app-store pages hain, ek bhi dedicated web tool nahi. **Sabse bada demand: mp3 to midi** (US cluster 23,490, global 28K). **Sabse aasaan build: yaml to json.**
- **Traffic ka bada hissa low-RPM countries se hai.** US + UK/DE/FR milake sirf 23–32% global volume banta hai; India/Indonesia/Philippines ka hissa 10–24% hai.
- **CPC bahut kam ($0 – $0.80)**, matlab AdSense RPM bhi kam rahega. Paanchon keywords top ranks par aa jaayein to bhi US traffic se andaza sirf ~$14–$144 per month hai (assumptions "Kamai ka reality check" me). Isliye 30–50+ tools ya zyada CPC wala niche chahiye.
- **Saara data US database ka hai**, jabki goal foreign countries ka tha. Agla step: UK, DE, FR, ES databases me same keywords check karna (translated seeds "Agle steps" me).

5 keywords ek nazar me

Keyword	US vol	KD (Semrush)	CPC	Intent	Global vol	US cluster (keywords / total vol)
mp3 to midi	5,400	23 (Easy)	$0.26	Informational	28.0K	1,848 kw / 23,490 (avg KD 19)
yaml to json	1,600	27 (Easy)	$0.00	Commercial	9.3K	671 kw / 9,070 (avg KD 21)
psd to png	2,900	31 (Possible)	$0.80	Commercial	15.1K	screenshot me nahi
stl to gcode	1,300	22	n/a	n/a	n/a	348 kw / 9.3K + 78 questions / 1.3K
etsy fee calculator	2,400	25	$0.31	Informational	n/a	7 kw (KD 0–30 filter) / 3,360

n/a = screenshot me nahi dikha. stl to gcode ka keyword-ideas panel database label ke bina tha; baaki screenshots US ke the, isliye US maana hai. Competitive Density: mp3 to midi 0.02, yaml to json 0.33, psd to png 0.01.

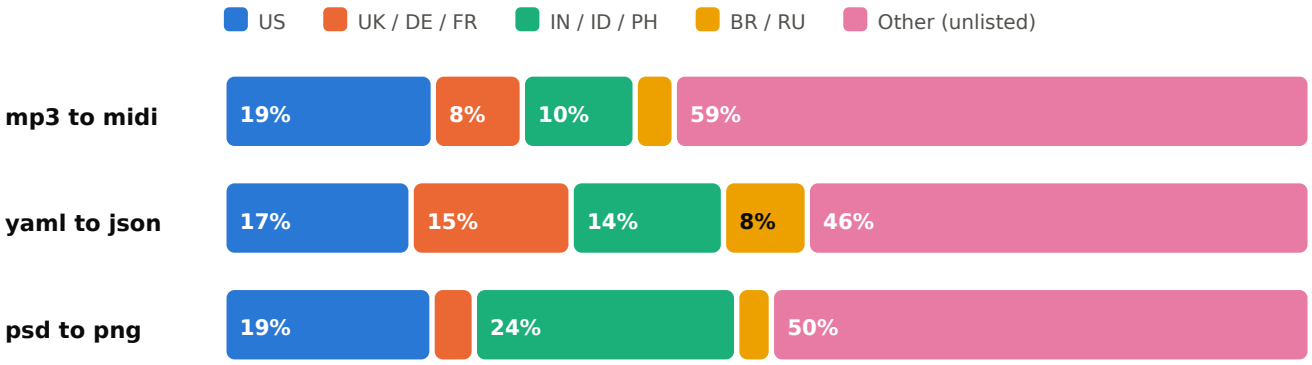

Ahrefs vs Semrush: KD seedha compare mat karo

Pehle maine Ahrefs ke ek article ke numbers diye the (KD 1, 4, 7...). Wahi keywords aapke Semrush me alag KD dikha rahe hain. Dono tools alag formula use karte hain, isliye ye gadbad nahi, scale ka farq hai. Volume dono me kaafi milta-julta hai, sirf yaml to json ka Semrush volume lagbhag 45% kam hai.

Keyword	Ahrefs KD (article)	Semrush KD (aapka)	Ahrefs vol	Semrush vol
mp3 to midi	10	23	5,700	5,400
yaml to json	1	27	2,900	1,600
psd to png	4	31	2,800	2,900
stl to gcode	1	22	1,100	1,300
etsy fee calculator	7	25	2,000	2,400

Kaunse countries se search aata hai (global volume split)

Teen keywords ke Global Volume panel se. Yahi dikhata hai ki "foreign" traffic me se kitna asli tier-1 hai.

Keyword	US	UK / DE / FR	IN / ID / PH	BR / RU	Other (unlisted)	US + UK/DE/FR
mp3 to midi	5,400 (19%)	2,300 (8%)	2,900 (10%)	1,000 (4%)	16,400 (59%)	28%
yaml to json	1,600 (17%)	1,370 (15%)	1,300 (14%)	720 (8%)	4,300 (46%)	32%
psd to png	2,900 (19%)	590 (4%)	3,660 (24%)	480 (3%)	7,500 (50%)	23%

Percent rounded hain. Screenshot ke rounded numbers ki wajah se country totals global volume se thoda (30 tak) alag aa sakte hain.

- **mp3 to midi** sabse zyada fela hua hai: UK 1.3K, France 1.0K, Brazil 1.0K, Indonesia 1.9K, Philippines 1.0K.
- **yaml to json**: India (1.3K) US ke baad #2 hai aur Russia 720; Germany 590, France 390, UK 390. Tier-1 Europe milake ~1.4K.
- **psd to png**: India + Indonesia + Philippines (24%) US + UK (23%) se zyada hain, isliye 15.1K global number dikhta bada hai, lekin kamai wala hissa chhota hai.
- "Other (unlisted)" me kaunse countries hain, ye screenshot me nahi dikhta. Isko Semrush me country-wise database badal kar dekhna padega.

SERP analysis: Google par abhi kaun rank kar raha hai

mp3 to midi (top 10)

#	Domain / page	Type	Signal
1	jukeblocks.io/free-tools/audio-midi-converter	Free tool page	Dedicated tool
2	songscription.ai/mp3-to-midi	AI tool page	Dedicated tool
3	ai-midi.com	AI tool site	Dedicated tool
4	craftmusic.ai/audio-to-midi-converter	AI tool page	Dedicated tool
–	AI Overview (5 links)		
5	reddit.com/r/edmproduction	Forum thread	Weak
6	eldoraudio.com/products/piano-audio-to-midi	Product page	Dedicated product
7	musiccreator.ai/audio-to-midi-converter	AI tool page	Dedicated tool
8	scarlettosullivan.wikidot.com	Wiki page	Weak
9	openmusic.ai/audio-to-midi	AI tool page	Dedicated tool
10	youtube.com (video)	Video	Weak

Matlab: 7 results dedicated tool/product pages hain, 3 weak (Reddit, wikidot, YouTube). Khali maidan nahi hai: jeetne ke liye converter sach me kaam karna chahiye. Top 10 me koi bada brand nahi dikhta, lekin in sites ki authority aur backlinks screenshot me blur the ("Get metrics"), isliye unki taqat yahan se nahi kaha ja sakta.

stl to gcode (87.8K results; top 8 dikhe)

#	Domain	Type	Signal
–	AI Overview (5 links)		
1	reddit.com (r/3Dprinting)	Forum thread	Weak
2	github.com (PrusaSlicer issue)	GitHub issue	Weak
3	cnccode.com	Blog article	Article
4	forum.freecad.org	Forum thread	Weak
5	forum.prusa3d.com	Forum thread	Weak
6	apps.apple.com (PikaSlice)	iOS app page	App
7	play.google.com	Android app page	App
8	forum.lulzbot.com	Forum thread	Weak

Matlab: visible 8 me 4 forums, 1 GitHub issue, 1 article, 2 app pages. Ek bhi dedicated web converter nahi. Sabse kamzor SERP yahi hai. Position 9–10 screenshot me nahi dikhe.

"Outranking Competitors' SEO" panel (3 competitor pages, domain naam blur):

	Readability	Word count	Load time
Page A	62	3,548	0.34 s
Page B	23	1,082	0.1 s
Page C	53	302	3.4 s

Ek competitor sirf 302 words aur 3.4 s load time ke saath bhi rank kar raha hai. Yani page quality ki bar yahan kam hai: ek saaf, 1,500–2,000 words ki guide (mera suggestion) kaafi ho sakti hai.

Question keywords (stl to gcode)

Keyword	Volume	KD
how to convert stl to gcode	260	7
how to convert stl file to gcode	210	4
how to convert gcode to stl	50	20
how to slice stl to gcode	50	6
how to transfer stl to gcode	40	2

Ye top-5 question keywords milake 610 searches hain (78 questions ka total 1.3K). Related: stl to gcode 1.3K (KD 22), gcode to stl 1.0K (KD 13), stl file to gcode 590 (KD 19), stl to gcode converter 480 (KD 12), convert stl to gcode 390 (KD 17).

Keyword-by-keyword: kya mila aur kya karna hai

1) mp3 to midi — sabse bada demand, sabse mushkil build

Data: US 5.4K, KD 23, CPC $0.26. Related: midi to mp3 2,400 (KD 37), mp3 to midi converter 1,600 (KD 29), mp3 to midi file conversion 1,000 (KD 17), mp3 to midi soundfont 880 (KD 22), turn mp3 to midi 590 (KD 19). Modifier groups: convert 1,180 kw, free 328, file 236, download 221, online 196.

Build: audio se notes nikalna (transcription) ek ML/pitch-detection kaam hai. Browser me chalne wale open-source models hote hain (jaise Spotify ka Basic Pitch; license aur quality khud verify karna). SERP me dedicated tools hain, isliye output ki quality zaroori hai. Pehle chhota prototype test karo.

Verdict: upside sabse bada, lekin effort bhi. Baad me "midi to mp3" (soundfont rendering) alag tool.

2) yaml to json — sabse aasaan, lekin kamai kam

Data: US 1.6K, KD 27, CPC $0. "yaml to json converter" 390 (KD 0), json to yaml 1,300 (KD 22), json to yaml converter 390 (KD 30), convert json to yaml 320 (KD 23), convert yaml to json 320 (KD 25). Modifiers: convert 291 kw, swagger 52, online 40, python 38, java 34, error 27. Trend chart ke aakhri do bars me tez uchhal.

Build: 1 din ka kaam (YAML/JSON libraries, sab client-side). Ek hi page dono directions + long-tail pages ("yaml to json python", "swagger yaml to json") serve kar sakta hai.

Verdict: pehla tool banane ke liye best (pipeline + AdSense test). CPC $0 aur developer audience (adblock zyada, mera general observation) ka matlab ad kamai kam. Is keyword ka SERP abhi nahi dekha.

3) stl to gcode — kamzor SERP, par ye "conversion" nahi slicing hai

Data: US 1.3K, KD 22; cluster 348 keywords / 9.3K; questions KD 2–7 (upar table).

Samajhne wali baat: STL se G-code banana ek format conversion nahi, slicing hai (printer, layer height, material settings chahiye). Isliye users forum aur guides me jaate hain. Browser slicer banana bada kaam hai, aur open-source slicer engines aksar AGPL license me hote hain (use se pehle check karo).

Verdict: pehle step-by-step guide + FAQ (question keywords ke liye), baad me tool soch sakte ho.

4) etsy fee calculator — chhota cluster, aasaan build

Data: main 2,400 (KD 25, CPC $0.31). Variants: etsy fees calculator 390 (KD 15), etsy calculator fees 210 (KD 16), calculating etsy fees 170 (KD 22), calculate etsy fees 70 (KD 20), etsy fee calculator 2025 70 (KD 18), etsy selling fees calculator 50 (KD 16). KD 0–30 filter me sirf 7 keywords, total 3,360.

Build: simple formula, lekin fees badalti rehti hain: Etsy ke official fee page se numbers khud verify aur update karte raho, galat number se bharosa tootega. Year wala variant (2025) dikhata hai ki "2026" version bhi check karna chahiye.

Foreign angle: UK/CA/AU/DE/FR sellers ke liye local currency aur VAT wale alag versions; UK/DE/FR database me check karo.

5) psd to png — baad ke liye

Data: US 2.9K, KD 31 (Possible), CPC $0.80 (sabse zyada), commercial intent. Global 15.1K me se IN/ID/PH 24%, US + UK 23%.

Verdict: KD in sab me sabse zyada, traffic low-RPM countries ki taraf jhuka hua, SERP abhi dekha nahi. PSD parsing browser me possible hai (libraries hain, license check karo), par badi files ek challenge hain.

Priority order (mera suggestion)

#	Tool	Kyun
1	yaml to json (bundle: json/csv/xml)	1 din me build, pipeline + AdSense approval test karne ke liye
2	stl to gcode guide	Sabse kamzor SERP, question keywords KD 2–7
3	etsy fee calculator (+ local versions)	Aasaan build; pehle UK/DE/FR/AU database check karo
4	mp3 to midi	Sabse bada demand; prototype pehle, phir poora build
5	psd to png	KD 31 aur low-RPM traffic; SERP dekhne ke baad

Kamai ka reality check (sirf andaza)

Formula: **pageviews = cluster volume × capture %**, aur **kamai = pageviews / 1,000 × RPM**. Maine capture 15%–30% aur RPM $2–$10 maana hai. Ye mere assumptions hain, AdSense ka asli data nahi. RPM low rakha hai kyunki Semrush CPC $0 se $0.80 ke beech hai. Low case = 15% × $2, high case = 30% × $10.

Tool	US cluster vol	Pageviews @15%	Pageviews @30%	Kamai / month (low – high)
mp3 to midi	23,490	3,524	7,047	$7 – $70
yaml to json	9,070	1,360	2,721	$3 – $27
stl to gcode	9,300	1,395	2,790	$3 – $28
etsy fee calculator	3,360	504	1,008	$1 – $10
psd to png (sirf main kw)	2,900	435	870	$1 – $9
Total (5 tools)	48,120	7,218	14,436	**$14 – $144**

Matlab: paanchon tools top ranks par aa jaayein tab bhi US traffic se mahine ke kuch dollar se ~$140 tak. Doosre countries ka traffic add hoga, lekin uska RPM kam hota hai. Ranking me mahine lag sakte hain aur koi guarantee nahi. Scale ke liye 30–50 tools + content, ya zyada CPC wala niche chahiye.

Agle steps (screenshots me kya bhejna hai)

- **SERP screenshots:** yaml to json, psd to png, etsy fee calculator (Keyword Overview me neeche SERP Analysis).
- **Overview screenshots:** stl to gcode aur etsy fee calculator (CPC aur Global Volume dikhne chahiye).
- **Foreign databases:** upar ke keywords UK, DE, FR, ES (aur CA/AU) database me check karo. Keyword Magic Tool me filter: KD 0–30, volume ≥ 300.
- **Device:** screenshots me Desktop selected tha; converters me mobile bhi bada hota hai, Mobile par bhi check karo.
- Jis keyword ke SERP me forum / Reddit / GitHub / app-store pages ho, wahan jeetna aasaan hota hai.

Translated seed keywords (ye ideas hain, Semrush me confirm karo)

Tool	Deutsch (DE)	Français (FR)	Español (ES)	Português (BR)
yaml to json	yaml in json umwandeln	convertir yaml en json	convertir yaml a json	converter yaml para json
mp3 to midi	mp3 in midi umwandeln	convertir mp3 en midi	convertir mp3 a midi	converter mp3 para midi
etsy fee calculator	etsy gebühren rechner	calculateur frais etsy	calculadora comisiones etsy	calculadora taxas etsy

Data ki limits

- Semrush volume aur KD estimates hain. KD ko alag-alag tools me compare mat karo.
- Competitor sites ki authority/backlinks screenshots me blur the, isliye "kamzor SERP" sirf page types par based hai.
- etsy fee calculator ka cluster KD 0–30 filter ke saath tha; psd to png ka cluster screenshot me nahi tha.
- Earnings table ek illustration hai, prediction nahi.

Source for Ahrefs numbers: Ahrefs blog, "The Free Tools SEO Strategy" (ahrefs.com/blog/the-free-tools-seo-strategy). Baaki sab numbers aapke SEMrush screenshots se.

Addendum: 2 naye keywords

Naye 6 SEMrush screenshots ka analysis (8 Nov 2026, United States, Desktop). Keywords: band name generator aur podcast name generator. Pichle 5 keywords ke saath compare karne ke liye wahi format rakha hai.

Seedha verdict

- band name generator abhi tak ka sabse achha keyword hai. KD 10% ("Very easy"), jo aapke KD < 10 wale target ke sabse kareeb hai. Pehle PDF me likha tha "KD 10 se neeche koi nahi mila", ye keyword ussi limit par hai (Semrush KD rounded dikhata hai).
- Traffic quality bhi behtar hai: global 18.4K me se US 44%, UK 16%, Canada 5%, Australia 5%. US + UK + CA + AU milake ~70%, jabki pehle ke keywords me ye 23–32% tha. India + Philippines sirf ~4%.
- CPC $0.82 (ab tak ke sabhi me sabse zyada, psd to png ke barabar), Competitive Density sirf 0.03, intent Informational.
- podcast name generator me KD 21% ("Easy") hai, par top 10 ke sabhi results brands ke dedicated tool pages hain (Riverside, Buzzsprout, Castos, Squarespace wagairah). SERP kaafi tough hai aur trend chart girta hua dikhta hai. Priority me peeche rakhna behtar.
- Dono ek hi type ke tools hain ("name generator"), isliye ek generator engine ek baar bana kar band, podcast aur doosre niches ke liye reuse ho sakta hai.

2 keywords ek nazar me

Keyword	US vol	KD (Semrush)	CPC	Intent	Global vol	Comp. density	US cluster (keywords / total vol)
band name generator	8,100	10 (Very easy)	$0.82	Informational	18.4K	0.03	939 kw / 20.9K (+ 4 questions / 20)
podcast name generator	2,900	21 (Easy)	$0.57	n/a	4.9K	0.34	114 kw / 5.4K (+ 1 question / 0)

Cluster numbers screenshot ke "Keyword Variations" panel se hain, database United States hai (screenshot ka selection). n/a = screenshot me nahi dikha.

Kaunse countries se search aata hai (global volume split)

Keyword	US	UK	CA	AU	IN	PH	DE	Other (unlisted)	Tier-1 English *
band name generator	8.1K (44%)	2.9K (16%)	1.0K (5%)	880 (5%)	390 (2%)	390 (2%)	n/a	4.7K (26%)	~70%
podcast name generator	2.9K (59%)	260 (5%)	260 (5%)	260 (5%)	140 (3%)	n/a	70 (1%)	1.0K (20%)	~75%

*US + UK + CA + AU. Percent rounded hain; "Other" me kaunse countries hain, screenshot me nahi dikhta. Dono keywords ka traffic English-speaking tier-1 countries ki taraf jhuka hai, jo AdSense ke liye achha signal hai (pehle ke mp3 to midi, yaml to json, psd to png me ye hissa 23–32% tha). Podcast ka total volume chhota hai (4.9K).

Keyword ideas

band name generator: cluster (939 keywords, 20.9K)

Keyword	Volume	KD
band name generator	8,100	10
band name generator kpop	880	16
band names generator	590	16
kpop band name generator	590	7
metal band name generator	590	9

Genre variants (kpop, metal) ka KD 7–16 hai aur volume 590–880. Rock, punk, country wagairah ki alag pages ka idea yahin se aata hai (volume Semrush me check karna). Questions panel bahut chhota hai: "a band name generator" 20, baaki teen 0. Semrush ka Keyword Strategy tree: band name maker, good band names, rock band name maker, cool band names, cool band names that aren't taken.

podcast name generator: cluster (114 keywords, 5.4K)

Keyword	Volume	KD
podcast name generator	2,900	21
generate a podcast name	260	21
podcast names generator	260	19
riverside podcast name generator	260	24
buzzsprout podcast name generator	170	41

Brand-wale keywords (riverside, buzzsprout) dikhate hain ki log competitor ke tool ko naam se dhundte hain. Question: "how to name your podcast generator" 0. Keyword Strategy tree: podcast names, good podcast names, podcast name ideas, podcast name generator free, podcast names generator.

SERP analysis: Google par abhi kaun rank kar raha hai

band name generator (top 10)

#	Domain / page	Type	Signal
1	indiesound.com/band-name-generator	Tool page	Dedicated tool
2	bandnamemaker.com	Tool site	Dedicated tool
3	inclassics.com/ai-tools-for-musicians/band-name-generator	AI tool page	Dedicated tool
4	fantasynamegenerators.com/band-names.php	Generator site	Dedicated tool
–	AI Overview (5 links)		
5	reddit.com/r/Bandnames	Forum thread	Weak
6	viewmaniac.com/band-name-generator (sitelinks)	Tool page	Dedicated tool
7	vistaprint.com/.../business-name-generator/band-names	Brand tool page	Dedicated tool
8	suno.bi/features/band-name-generator	Feature page	Dedicated tool
9	wikihow.com/Band-Name-Generator	Article	Weak
10	basschat.co.uk/topic/509819-band-name-generator	Forum thread	Weak

Matlab: 7 dedicated tool pages, 3 weak (Reddit, wikiHow, forum). Position 5, 9 aur 10 par weak pages hain, yani entry ka rasta khula hai. Fantasy Name Generators aur Vistaprint jaise established sites top 10 me hain. Page AS, backlinks aur traffic columns blur the ("Get metrics"), isliye authority yahan se nahi kahi ja sakti.

podcast name generator (top 10)

#	Domain / page	Type	Signal
1	podpage.com/podcast-name-generator	Tool page	Dedicated tool
–	AI Overview (3 links)		
2	riverside.com/podcast-name-generator	Brand tool page	Dedicated tool
3	buzzsprout.com/podcast-name-generator	Brand tool page	Dedicated tool
4	choppity.com/tools/podcast-name-generator	Brand tool page	Dedicated tool
5	teleprompter.com/tools/podcast-name-generator	Brand tool page	Dedicated tool
6	castos.com/tools/podcast-name-generator	Brand tool page	Dedicated tool
7	originality.ai/blog/podcast-name-generator	Blog + tool	Dedicated tool
8	squarespace.com/tools/podcast-name-generator	Brand tool page	Dedicated tool
9	jellypod.com/tools/podcast-name-generator (sitelinks)	Brand tool page	Dedicated tool
10	vistaprint.com/.../business-name-generator/podcast-names	Brand tool page	Dedicated tool

Matlab: 10 me se 10 dedicated tool pages, aur zyada tar podcast/creator-software companies ke free-tool pages hain (wahi "free tools SEO" strategy). Ek bhi forum ya Reddit result nahi. Is SERP me jeetna band name generator se mushkil hai, KD 21 ke bawajood. Authority metrics blur the.

"Outranking Competitors' SEO" panel

Dono keywords ke screenshots me ye panel bilkul wahi numbers dikhata hai (62 / 3,548 words / 0.34 s; 23 / 1,082 / 0.1 s; 53 / 302 / 3.4 s), jo pehle stl to gcode me bhi the. Isliye ye shayad keyword-specific nahi hai. Isse competitor page ki quality ka andaza mat lagao, apne SERP ke pages khud kholkar dekho.

Trend chart

band name generator: pehla bar sabse ooncha, uske baad upar-neeche, aakhri bars thode neeche. podcast name generator: pehla bar ooncha, phir dheere dheere ghatta hua, aakhri teen bars sabse chhote. Screenshot me bars ka exact number nahi hai, ye sirf shape se andaza hai. Semrush me 12 mahine ka trend khud confirm karo.

Keyword-by-keyword: kya karna hai

6) band name generator: pehle ye banao

Data: US 8.1K, KD 10, CPC $0.82, density 0.03; tier-1 English ~70%. Cluster 939 kw / 20.9K.

Build: word lists + naming patterns (adjective + noun, "The ..." style) se random generator, genre selector (rock, metal, kpop, punk, country...). Pehla version 1–2 din me ban sakta hai. Asli mehnat naam ki quality aur variety me hai, kyunki SERP ke tool pehle se maujood hain. AI model use karoge to har request par API cost aayegi, isliye pehle bina-AI version socho. Har genre ke liye alag page long-tail keywords pakad sakta hai. Fantasy name generator jaisi purani sites top 10 me hain, isliye design aur "available naam" jaisi extra cheez diferentiator ban sakti hai (domain/social handle availability check ek idea hai, API aur cost check karne hongi).

Verdict: abhi ka #1 candidate. Pehle SERP ke top 4 pages khud kholkar dekho.

7) podcast name generator: baad me

Data: US 2.9K, KD 21, CPC $0.57, density 0.34. Build wahi engine, alag word lists. Lekin SERP me sirf brands hain aur trend ghat raha dikhta hai. Band name generator ke baad same engine se test karo.

Updated priority order (7 tools)

#	Tool	Kyun
1	band name generator	Sabse kam KD (10), ~70% tier-1 English traffic, SERP me 3 weak pages, CPC $0.82
2	yaml to json (bundle: json/csv/xml)	1 din me build, pipeline + AdSense approval test karne ke liye
3	stl to gcode guide	Sabse kamzor SERP, question keywords KD 2–7
4	etsy fee calculator (+ local versions)	Aasaan build; pehle UK/DE/FR/AU database check karo
5	podcast name generator	Same engine reuse hota hai, par SERP me sirf brands, trend neeche
6	mp3 to midi	Sabse bada demand; prototype pehle, phir poora build
7	psd to png	KD 31 aur low-RPM traffic; SERP dekhne ke baad

Kamai ka reality check: 2 naye keywords (sirf andaza)

Wahi formula aur wahi assumptions: pageviews = cluster volume × capture %, kamai = pageviews / 1,000 × RPM; capture 15%–30%, RPM $2–$10. Low = 15% × $2, high = 30% × $10. Band name generator ka CPC $0.82 hai, to RPM is range me kahin bhi ho sakta hai; maine consistency ke liye wahi range rakhi hai. Ye assumptions hain, AdSense ka asli data nahi.

Tool	US cluster vol	Pageviews @15%	Pageviews @30%	Kamai / month (low – high)
band name generator	20,900	3,135	6,270	$6 – $63
podcast name generator	5,400	810	1,620	$2 – $16
Naye 2 ka total	26,300	3,945	7,890	$8 – $79
Pehle 5 + naye 2 (7 tools)	74,420	11,163	22,326	$22 – $223

Matlab: dono naye keywords milake bhi US traffic se mahine ke kuch dollar se ~$80 tak. Do tools adhik jodne se total $14–$144 se badhkar $22–$223 hota hai. Ranking me mahine lag sakte hain aur koi guarantee nahi. Scale ke liye ab bhi 30–50 tools chahiye. Ek generator engine reuse karke tools banana yahan sabse sasta rasta hai.

Agle steps

- band name generator ka SERP khud kholo: top 4 pages ki quality, ads, load speed, aur kya unme genre-wise options hain.
- Keyword Magic Tool me "band name generator" ke genre/style variants dekho (rock, metal, punk, country, funny, kpop). Filter: KD 0–30, volume ≥ 300.
- Band name generator ko UK, CA, AU database me check karo (tier-1 English). Podcast name generator ko bhi CA/AU me dekho.
- Doosre "name generator" keywords check karo: Semrush ke Keyword Strategy panel me jo clusters aaye (band name maker, cool band names) unka volume alag dekho.
- Mobile device par bhi dono keywords check karo; screenshots Desktop ke the.

Data ki limits

- Semrush volume aur KD estimates hain; KD alag tools me compare mat karo.
- SERP ka "kamzor/tough" abhi sirf page types par based hai, kyunki authority aur backlinks blur the.
- Cluster numbers ko United States database ka maana hai (screenshot ka selection); Semrush ke label ke bina confirm nahi hota.
- Trend chart me axis numbers nahi the, isliye direction sirf bars ke shape se padhi hai.
- Earnings table ek illustration hai, prediction nahi.

Addendum 2: 3 aur keywords

Naye 9 SEMrush screenshots ka analysis (8 Nov 2026, United States, Desktop). Keywords: clan name generator, wedding seating chart template, construction estimate template. Format pichle pages jaisa hai.

Seedha verdict

- construction estimate template sabse interesting hai: KD 12% (Very easy), CPC $8.22 (ab tak ke sabhi me sabse zyada, baaki sab $0 se $1.16), aur ~71% traffic US/AU/CA/UK se. Volume chhota hai (US 1.0K, cluster 6.8K).
- Iske SERP me koi bada dedicated template tool nahi dikhta: Scribd, Pinterest (2), template.net, Jotform aur kai blog articles (simplywise, mastt, sinnaps, proposable x2). Authority metrics blur the, isliye taqat confirm nahi hoti.
- wedding seating chart template: KD 27% (Easy), CPC $1.16, ~77% tier-1 English traffic, aur Semrush me Ads 2 dikhe. Par top results lagbhag sab Etsy product listings hain (visible 9 me se 6), 2 Pinterest, 1 Corjl. Yaani Google yahan khareedne wale templates dikha raha hai. Free tool ke liye ye mushkil SERP hai. Cluster ke dusre keywords ka KD 33–47 hai.
- clan name generator: US 1.6K, KD 25%, CPC $0. Cluster 19.7K me se lagbhag 9.4K sirf "wu tang clan name generator" variants ka hai (5.4K + 2.4K + 1.6K), jo alag intent hai aur "Wu-Tang Clan" ek brand naam hai. Us naam ko apne tool me use karne se pehle trademark ka risk khud check karo. Asli "clan name generator" ka volume 1.6K hai. SERP me 7 dedicated generator pages hain.
- Clan name generator wahi "name generator" engine reuse karta hai jo band/podcast ke liye soch rahe the, isliye extra build kam lagega, par CPC $0 ka matlab ad kamai kam.

3 keywords ek nazar me

Keyword	US vol	KD (Semrush)	CPC	Intent	Global vol	Comp. density	US cluster (kw / vol)
clan name generator	1,600	25 (Easy)	$0	Informational	3.8K	0.33	924 kw / 19.7K (+ 5 questions / 40)
wedding seating chart template	2,900	27 (Easy)	$1.16	Informational	4.8K	1.00	387 kw / 11.3K (+ 3 questions / 0)
construction estimate template	1,000	12 (Very easy)	$8.22	Informational	1.9K	1.00	374 kw / 6.8K (+ 1 question / 0)

Cluster numbers "Keyword Variations" panel se hain, database United States (screenshot ka selection). Wedding seating chart template me Ads 2 dikha, baaki dono me Ads/PLA n/a. Competitive Density 1.00 ka matlab paid side par bahut advertisers hain.

Kaunse countries se search aata hai (global volume split)

Keyword	US	UK	CA	AU	Others listed	Other (unlisted)	Tier-1 English*
clan name generator	1.6K (42%)	320 (8%)	260 (7%)	170 (4%)	DE 210 (6%), TR 140 (4%)	1.1K (29%)	~62%
wedding seating chart template	2.9K (60%)	320 (7%)	320 (7%)	170 (4%)	PH 110 (2%), AE 20	920 (19%)	~77%
construction estimate template	1.0K (53%)	90 (5%)	90 (5%)	170 (9%)	RU 70 (4%), IN 40 (2%)	460 (24%)	~71%

*US + UK + CA + AU. Percent rounded hain. Teeno keywords ka traffic English-speaking tier-1 countries ki taraf jhuka hai (clan me kam, kyunki Germany aur Turkey ka hissa hai). "Other" me kaunse countries hain, screenshot me nahi dikhta.

Keyword ideas

clan name generator (924 keywords, 19.7K)

Keyword	Volume	KD
wu tang clan name generator	5,400	31
wutang clan name generator	2,400	29
clan name generator	1,600	25
wu-tang clan name generator	1,600	24
warrior cat clan name generator	480	17

Top 4 me se 3 Wu-Tang ke hain, aur 5 me se 4 question keywords bhi (volume 20, 20, 0, 0). Semrush Keyword Strategy tree: amazing clan names, good clan names for clash of clans, coolest clash of clans names, cool clan names, nice names for clans. Yaani gaming (Clash of Clans) angle bhi hai. "warrior cat clan name generator" 480 (KD 17) ek alag niche dikhata hai.

wedding seating chart template (387 keywords, 11.3K)

Keyword	Volume	KD
wedding seating chart template	2,900	27
wedding seating chart templates	1,600	42
sample wedding seating chart template	1,000	47
seating chart template wedding	1,000	38
seating chart template for wedding	480	33

Sirf main keyword KD 27 par hai, uske variants KD 33–47 par (yaani "Possible" zone). 3 question keywords ka volume 0. Keyword Strategy tree: wedding seating chart, wedding seating chart ideas, free seating chart maker, wedding seating arrangement chart, seating arrangement ideas.

construction estimate template (374 keywords, 6.8K)

Keyword	Volume	KD
construction estimate template	1,000	12
construction estimate template excel	260	20
construction estimate templates	260	23
construction estimate template xls	210	25
construction work estimate template	210	24

Excel/xls variants ka volume 210–260 aur KD 20–25, yaani log downloadable spreadsheet dhundh rahe hain. 1 question keyword (volume 0). Keyword Strategy tree: template for construction estimate, construction estimate format, estimates templates for construction, estimate template excel, free construction estimate template.

SERP analysis: Google par abhi kaun rank kar raha hai

clan name generator (top 10, AI Overview 4 links ke saath)

#	Domain / page	Type	Signal
–	AI Overview (4 links)		
1	plarium.com/en/resource/generator/clan-name-generator	Game company tool	Dedicated tool
2	fantasynamegenerators.com/gang-names.php	Generator site	Dedicated tool
3	apps.quanticfoundry.com/guildnames	Tool	Dedicated tool
4	pinterest.com/ideas/random-clan-name-generator	Pinterest	Weak
5	usernamegenerator.com/clan	Generator site	Dedicated tool
6	design.com/business-name-generator/tag/clan	Brand tool page	Dedicated tool
7	genname.io/gen/clan-names (sitelinks)	Generator site	Dedicated tool
8	forums.taleworlds.com (thread)	Forum thread	Weak
9	addons.mozilla.org/.../clan-name-generator	Firefox add-on page	App listing
10	nickfinder.com/Clan	Generator site	Dedicated tool

Matlab: 7 dedicated generator pages, 2 weak (Pinterest, forum), 1 add-on listing. Fantasy Name Generators, Plarium aur Design.com established sites hain. Wu-Tang ke results visible 10 me nahi dikhe.

wedding seating chart template (top 9 dikhe, position 10 screenshot me nahi)

#	Domain / page	Type	Signal
1	etsy.com/listing/281367720/wedding-seating-chart-template-rustic	Etsy listing (image)	Product
2	pinterest.com/ideas/wedding-seating-chart-template-...	Pinterest (image)	Weak
3	etsy.com/market/wedding_seating_chart_template_for_6_tables	Etsy category (image)	Product
4	corjl.com/en/web/showcase/templates/wedding/seating-chart	Template showcase	Product/template
5	etsy.com/listing/4389661220/minimalist-wedding-seating-chart	Etsy listing (image)	Product
6	pinterest.com/pin/instantly-download-free-printable-...	Pinterest pin (image)	Weak
7	etsy.com/listing/1404804103/...-elegant	Etsy listing (image)	Product
8	etsy.com/listing/532978026/instant-download-wedding-seating-chart	Etsy listing (image)	Product
9	etsy.com/listing/515231220/wedding-seating-chart-template-table	Etsy listing (image)	Product

Matlab: 6 Etsy pages, 1 Corjl, 2 Pinterest. Koi blog ya free tool nahi dikha. Google yahan khareedne wali intent maan raha hai, isliye informational tool page ko Etsy ke saamne jagah milna mushkil ho sakta hai. Authority metrics blur the.

construction estimate template (Image pack 6 links + top 10)

#	Domain / page	Type	Signal
–	Image pack (6 links)		
1	scribd.com/document/899232628/Construction-Estimate-Template	Document upload	Weak
2	template.net/estimate/8	Template site	Template download
3	pinterest.com/pin/estimate-templates-blank-downloadable-...	Pinterest pin	Weak
4	jotform.com/form-templates/construction-estimate-form	Form template	Template/tool

#	Domain / page	Type	Signal
5	simplywise.com/blog/general-estimate-template	Blog	Article
6	mastt.com/resources/commercial-construction-estimate-template	Resource page	Article
7	sinnaps.com/.../construction-cost-estimate-template	Blog	Article
8	proposable.com/blog/6-estimate-templates-you-need-for-a-construction-job	Blog	Article
9	pinterest.com/ideas/excavation-estimate-template	Pinterest	Weak
10	proposable.com/blog/6-estimate-templates-you-need-for-a-construction-job	Blog (same URL as #8)	Article

Matlab: 2 Pinterest + 1 Scribd (weak), 5 blog/resource articles (ek hi URL #8 aur #10 par), 2 template/form pages (template.net, Jotform). Ek bhi bada dedicated online estimate builder nahi dikha. Image pack ka matlab hai ki template ki image/preview bhi click kheenchegi.

Trend aur "Outranking Competitors' SEO" panel

Trend (bars ke shape se, axis numbers nahi): clan: pehle 4 bars ooche, baaki thode neeche aur barabar. wedding: pehla bar sabse ooncha, phir dip, baad me dheere dheere upar. construction: aakhri 5 bars sabse ooche, yaani haal me upar ja raha dikhta hai.

Panel: ye panel in teeno screenshots me bhi wahi numbers dikhata hai (62 / 3,548 / 0.34; 23 / 1,082 / 0.1; 53 / 302 / 3.4), jo ab band, podcast, stl, clan, wedding aur construction, sabme same hain. Isliye ye keyword-specific nahi hai, ise ignore karo.

Keyword-by-keyword: kya karna hai

8) clan name generator

Data: US 1.6K, KD 25, CPC $0, density 0.33; tier-1 English ~62%. Build: wahi name-generator engine, gaming/fantasy word lists (Clash of Clans, warrior cats jaisi sub-pages alag). Wu-Tang variants (9.4K) ko target karne se pehle trademark aur intent dono sochna padega. SERP me 7 generators hain, isliye differentiator chahiye (jaise game-wise options). Verdict: band name generator ke baad same engine se banao, par CPC $0 hai to kamai kam.

9) wedding seating chart template

Data: US 2.9K, KD 27 (variants 33–47), CPC $1.16, ads 2; tier-1 English ~77%. SERP Etsy product listings se bhara hai. Do raaste: (a) printable PDF/PNG templates banao aur free download do (build design ka kaam hai), (b) "free seating chart maker" jaisa interactive tool (drag and drop) banao, jo SERP ke product pages se alag keyword pakadta hai. (b) ka volume Semrush me alag check karna hoga, screenshot me nahi tha. Verdict: aasaan nahi, pehle "free seating chart maker" keyword check karo.

10) construction estimate template

Data: US 1.0K, KD 12, CPC $8.22, density 1.00; tier-1 English ~71%. Build: online estimate builder (items, quantity, rate, tax, total, PDF export) + downloadable Excel/Google Sheets template. Excel variants (260 / 210) isse match karte hain. Formula simple hai, lekin audience contractors hain: layout, currency/unit options aur clear PDF output zaroori hain. Verdict: chhota volume par CPC bahut zyada, to ad revenue per visitor behtar ho sakta hai. Pehla prototype banane layak.

Updated priority order (10 tools)

#	Tool	Kyun
1	band name generator	KD 10, ~70% tier-1 English, cluster 20.9K, SERP me 3 weak pages
2	construction estimate template	KD 12, CPC $8.22, SERP me blogs/Pinterest/Scribd, koi bada tool nahi dikha
3	yaml to json (bundle: json/csv/xml)	1 din me build, pipeline + AdSense approval test karne ke liye
4	stl to gcode guide	Sabse kamzor SERP, question keywords KD 2–7
5	etsy fee calculator (+ local versions)	Aasaan build; UK/DE/FR/AU database check karo
6	wedding seating chart template / free seating chart maker	CPC $1.16, 77% tier-1; par SERP Etsy listings se bhara
7	clan name generator	Same engine reuse, 7 tool pages SERP me, CPC $0
8	podcast name generator	Same engine, par SERP me sirf brands, trend neeche
9	mp3 to midi	Sabse bada demand; prototype pehle, phir poora build
10	psd to png	KD 31 aur low-RPM traffic; SERP dekhne ke baad

Ye order mera suggestion hai: #1 aur #2 ke beech volume (8.1K vs 1.0K) aur CPC ($0.82 vs $8.22) ka trade-off hai, isliye dono ka chhota version test karna theek rahega.

Kamai ka reality check: 3 naye keywords (sirf andaza)

Wahi formula aur assumptions: pageviews = cluster volume × capture %, kamai = pageviews / 1,000 × RPM; capture 15%–30%, RPM $2–$10. Low = 15% × $2, high = 30% × $10.

Tool	US cluster vol	Pageviews @15%	Pageviews @30%	Kamai / month (low – high)
clan name generator	19,700	2,955	5,910	$6 – $59
wedding seating chart template	11,300	1,695	3,390	$3 – $34
construction estimate template	6,800	1,020	2,040	$2 – $20
Naye 3 ka total	37,800	5,670	11,340	$11 – $113
Pehle 7 (page 9 tak)	74,420	11,163	22,326	$22 – $223
Kul 10 tools	112,220	16,833	33,666	$34 – $337

Dhyan do: clan cluster ka lagbhag aadha Wu-Tang variants se hai (CPC $0). Unko hata do to core cluster ~10.3K bachta hai, jiska andaza ~$3 – $31 hai. Construction estimate ka CPC $8.22 hai, to $2–$10 RPM uske liye kam ho sakta hai. Sirf illustration ke liye: agar RPM $10–$30 ho to 1,020 × $10/1,000 se 2,040 × $30/1,000 tak ~$10 – $61 aata hai. Ye mera assumption hai, AdSense ka data nahi. Ranking me mahine lag sakte hain aur koi guarantee nahi.

Agle steps

- construction estimate template ke top pages khul ke dekho: kya koi interactive builder hai, ya sirf downloads/blog? "construction estimate" ke related keywords (estimate calculator, estimating spreadsheet, cost estimate) Keyword Magic Tool me dekho (KD 0–30, volume ≥ 300).
- wedding seating chart: "free seating chart maker", "seating chart maker" ka volume aur SERP check karo. SERP ka position 10 bhi dekho.
- clan name generator: Wu-Tang ke bina variants (warrior cat, clash of clans, fantasy, gaming clan) ka volume dekho.
- Teeno keywords UK, CA, AU database me check karo (tier-1 English), aur Mobile par bhi.
- "Get metrics" wale blur columns ke liye jo bhi SERP pages shortlist ho, unka authority/backlinks alag se check karo.

Data ki limits

- Semrush volume aur KD estimates hain; cluster numbers United States database ke maane gaye hain.
- SERP ka "weak/tough" sirf page types par based hai (authority blur thi). Wedding SERP me position 10 nahi dikha.
- Trend sirf bars ke shape se padha gaya; clan ke 5th bar ke baad ka girna thoda hai, exact nahi.
- Construction ka dusra URL (#10) #8 jaisa hi dikha; ye screenshot me aise hi tha.
- Kamai table ek illustration hai, prediction nahi.
